Re - Docket No. 99-040-1

I apologize for the tardiness of this comment and I realize that the comment period is closed, but will send it on anyway.

I strongly support the expansion of definition of "dog" to include all *Canis lupus* and *C. familiaris* animals, thereby allowing use of products licensed for "dogs" to be used more widely. This is especially relevant for the use of rabies vaccines in wolf-dog hybrids.

I think this is a giant step in the right direction and it has my full concurrence.
