

November 3, 1999

To whom it may concern:

I agree with the proposal to amend the Virus-Serum-toxin Act regulation, adding the definition of a dog to include all members of the Canis familiars, Canis lupus or any wolf-dog cross. These Hybrids should also have recognition of vaccine efficacy. I have not seen any serious adverse reactions or complications with the killed Rabies vaccine in the hybrids and they should be recognized as vaccinated animals.

Sincerely,

Martha Eaton D.V.M.
